Developing Insurance Service Partnerships

Project Title	Developing Insurance Service Partnerships
Project Summary	Do you thrive in a challenging, fast-paced work environment? Can you research partnerships that are focused on assisting Servicemembers, Veterans and their families? Are you a wiz at creating data visualizations? If you answered yes, we want you to join our VA Insurance Service team!
Country	United States

Project Description

VA Insurance Service offers financial security for Veterans, service members, and their spouses and dependent children. We are looking at expanding our community engagement efforts. The primary purpose of this project is to support the development and maintenance of collaborative partnership agreements between and among VBA, private industry, non-profit organizations and other agencies within the federal government pertaining to life insurance.

Insurance Service will select an interested and qualified intern to join its Philadelphia, PA based administrative and program staff in the delivery of support of life insurance programming initiatives. The project will include conducting research, developing analysis and presenting findings as it pertains to community engagement and education opportunities.

The intern will identify partnership opportunities with organizations from all levels of government, Veteran Service Organizations, nonprofits and private sectors that can collaborate without barriers as they provide transitioning Service members, Veterans, and their families a world-class experience that honors their service. They will plan, schedule, and attend meetings with external stakeholders and executives to collect information and discuss shared interests. In addition, the they will have the opportunity to conduct research on potential partnerships and recommend strategies of engagement. As part of their role they will coordinate with multiple stakeholders, both internal and external, to drafting memorandum of understanding or other partnership agreements.

Internship hours and duration are flexible.
